

**TESTIMONIAL**

*"Tim,*

*Thanks for the quick reply. We are using the SpeedLoc's regularly on our VMC - the HMC should be online mid-April, and that is where they will be used 100%. In combination with our fixture plates, they are fabulous! We neither have to tear down or set-up (tooling excluded) other than quickly changing out the fixture plate, meaning I am ready to run jobs as soon as one finishes. This is a significant improvement considering we used to do 1-op per set-up with 1-hour per set-up. One particular part I am running (photo attached) I have saved 3-set-ups and decreased cycle times drastically.*

*How does that sound?"*
